Course overview

Boards and regulators increasingly ask how technology decisions are governed: who sets direction, how performance is measured and how risk is managed. COBIT 2019 from ISACA is a widely used framework for answering those questions. This two-day course explains COBIT 2019 clearly and prepares you for the COBIT Foundation exam.

Day one introduces the framework: the difference between governance and management, the principles for a governance system and a governance framework, and the components of a governance system such as processes, organisational structures, information flows and culture. It then walks through the core model of governance and management objectives grouped into domains. Day two covers design factors and focus areas, how to tailor a governance system for an organisation, performance management with capability and maturity levels, the goals cascade, and an overview of the implementation approach, followed by exam preparation.

Exercises connect the framework to real situations. You will analyse design factors for a case organisation, map business goals to governance objectives through the goals cascade, and assess capability for a sample process. Discussion throughout draws on governance challenges common in Indian and Gulf organisations.

This course is aligned to the COBIT 2019 Foundation exam from ISACA. Confirm the current exam details and fees on the ISACA website before booking.

Highlights

- 16 hours of live, interactive sessions
- Governance principles and the core model
- Design factors and tailoring a governance system
- Performance management and capability levels
- Mock exam with review

What's included

- Trainer with IT governance and audit experience
- Plan aligned to the COBIT 2019 Foundation exam
- Design factor and goals cascade exercises
- Capability assessment practice
- Practice questions and mock exam
- Course completion certificate from Ace Skills Consulting

Who this course is for

Who should attend

- IT managers and CIO office staff
- IT auditors and assurance professionals
- Risk, compliance and governance professionals
- Consultants advising on IT governance

Prerequisites

- No formal prerequisites
- Experience in IT management, audit or risk is helpful

Detailed curriculum — 2 days, 16 hours, 7 modules, 3 hands-on labs

Certification exam

This course is aligned to the exam below and prepares you for it. The exam itself is booked and taken with the vendor.

Exam	COBIT 2019 Foundation
Exam code	COBIT 2019
Questions	75
Duration	120 minutes
Passing score	65%
Format	Multiple choice
Delivery	Online proctored
Official page	https://www.isaca.org/credentialing/cobit

Exam skill areas covered

COBIT 2019 Foundation components

Exam details are pending verification. Confirm the current exam code, format and fee on the official vendor page before booking.

Frequently asked questions

Is the exam fee included?

No. You buy the exam directly from ISACA unless the batch shows an exam voucher badge.

Do I need audit experience?

No. The course suits anyone involved in IT management, risk or governance.

How does COBIT relate to ITIL?

COBIT defines what should be governed and managed, while ITIL gives detailed guidance on service management practices. They are often used together.

Can you run this for our leadership team?

Yes. We run private batches for corporate teams, online or onsite.
