Course overview

Enterprise architects connect strategy to delivery. They decide which capabilities a business needs, how information and applications should support them, and in what order change should happen. The TOGAF Standard gives that work a shared vocabulary and a repeatable method, and this four-day course teaches you to use it with confidence rather than recite it.

The first two days build Foundation-level knowledge: the structure of the 10th Edition, the Architecture Development Method (ADM) and its phases, architecture content and deliverables, the Enterprise Continuum, the architecture repository and governance. Each concept is tied to a running case — a mid-sized organisation planning a digital transformation — so the terms stay concrete.

Days three and four move to Practitioner-level thinking. You will tailor the ADM, manage stakeholders, handle architecture requirements, plan migrations and apply risk and capability-based planning. Group workshops ask you to pick the best response to realistic scenarios, which is exactly the judgement the Practitioner exam rewards.

Sessions are live and interactive, with time for questions from your own organisation. You leave with reusable worksheets for each ADM phase and a clear plan for booking your exams with The Open Group.

This course is aligned to the TOGAF Enterprise Architecture Foundation and Practitioner exams. Ace Skills is not The Open Group and does not use official courseware; please confirm the current exam structure on The Open Group website before booking.

Highlights

- 32 hours of live, trainer-led sessions
- Covers both Foundation and Practitioner levels
- Scenario workshops built around a fictional enterprise
- ADM phase-by-phase worksheets you can reuse at work
- Practice questions in both exam styles with review

What's included

- Foundation and Practitioner content in one course
- Running case study across all ADM phases
- Stakeholder map, capability map and roadmap worksheets
- Scenario-based workshops in small groups
- Practice questions with explained answers
- Course completion certificate from Ace Skills Consulting
- Post-training doubt support while you prepare

Who this course is for

Who should attend

- Solution and technical architects moving into enterprise architecture
- IT strategy and planning managers
- Business analysts working on transformation programmes
- Programme and portfolio managers who work with architects
- Consultants advising on IT governance and modernisation

Prerequisites

- Several years of experience in IT, business analysis or solution design
- Familiarity with how projects and programmes are run in large organisations
- No prior TOGAF knowledge is required

Detailed curriculum — 4 days, 32 hours, 13 modules, 7 hands-on labs

Day 1 Foundations of Enterprise Architecture

8 hours

1.1 Why enterprise architecture

- What an enterprise and an architecture are
- Benefits and typical failure patterns
- Business, data, application and technology domains
- Structure of the TOGAF Standard, 10th Edition

1.2 Core concepts

- Architecture Development Method overview
- Enterprise Continuum
- Architecture capability
- Architecture content and deliverables
- Architecture repository

LAB Map a case organisation to the four architecture domains · 45 min

1.3 Preliminary phase

- Defining the architecture capability
- Tailoring the framework
- Architecture principles
- Governance and sponsorship

LAB Draft architecture principles for the case organisation · 40 min

Day 2 The ADM in Practice: Phases A to D

8 hours

2.1 Phase A: Architecture Vision

- Statement of architecture work
- Business scenarios
- Stakeholder identification and concerns
- Value propositions

LAB Build a stakeholder map and architecture vision · 50 min

2.2 Phase B: Business Architecture

- Capabilities and value streams
- Baseline and target descriptions
- Organisation mapping
- Gap analysis

2.3 Phases C and D

- Data and application architecture
- Viewpoints and views
- Architecture requirements
- Technology architecture
- Building blocks

LAB Gap analysis across business, data and technology · 45 min

Day 3 Opportunities, Migration and Governance

8 hours

3.1 Phases E and F

- Opportunities and solutions
- Migration planning
- Work packages and transition architectures
- Implementation and migration plan

LAB Create a three-step transition roadmap · 50 min

3.2 Phases G and H

- Implementation governance
- Architecture change management
- Architecture contracts
- Compliance reviews

3.3 Requirements management

- Managing requirements across the ADM
- Traceability
- Change requests

3.4 Foundation exam readiness

- Question styles and timing
- Practice set with review
- Common traps in terminology

Day 4 Practitioner Skills and Scenario Workshops

8 hours

4.1 Tailoring and iteration

- Iterating the ADM
- Adapting the ADM for agile delivery
- Architecture landscape levels
- Security and risk considerations

4.2 Planning techniques

- Capability-based planning
- Risk management
- Business transformation readiness
- Interoperability requirements

LAB Readiness and risk assessment workshop · 45 min

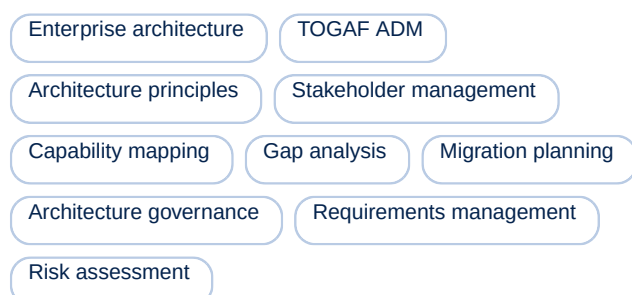

4.3 Practitioner exam readiness

- How scenario questions are graded
- Choosing between close answers
- Reading the scenario for the key concern
- Practice scenarios with group review

LAB Timed scenario practice in groups · 60 min

Skills and tools

Skills you will build

Tools used in class

Certification exam

This course is aligned to the exam below and prepares you for it. The exam itself is booked and taken with the vendor.

Exam

TOGAF Enterprise Architecture Foundation and Practitioner

Exam skill areas covered

Architecture framework components and the structure of the TOGAF Standard
Architecture Development Method (ADM) Enterprise Continuum

Exam details are pending verification. Confirm the current exam code, format and fee on the official vendor page before booking.

Frequently asked questions

Does this course cover both TOGAF levels?

Yes. Days one and two focus on Foundation knowledge and days three and four on Practitioner-style scenario work.

Can I take both exams together?

The Open Group has offered the levels as separate exams and as a combined option. We confirm the current structure with you before you book.

Is this course useful without the exam?

Yes. Many learners attend for the method and the worksheets, which apply directly to architecture work.

Do I need a technical background?

Not deeply. Experience in IT, business analysis or programme delivery is enough to follow the material.

Can you run this for our architecture team?

Yes. Private batches can use a case modelled on your own organisation.
